

## M. C. A. Management of Conservation Areas

Next round: October 2019

### Get in contact!

The master of science programme *Management of Conservation Areas* is supported by a network of regional contact points.

The demand of highly skilled experts in the field of nature conservation is growing. "Twelve professionals dealing with nature conservation support our team as regional contact points. They benefitted from capacity building in Austria and can inform you about their personal experiences. For a first contact you can refer to them in your region and language to get an insight into student life in Austria and the outstanding academic education", says Dr. Michael Jungmeier, the scientific head of the course.

Susanne Glatz-Jorde, the programme coordinator, points out the key learning outcomes for the graduates particularly in peripheral regions or developing countries "The programme graduates will gain hard and soft skills to create mutual benefits for nature conservation on the one hand and the local population on the other hand."

We are looking forward to hearing from you!

## European Parks Academy E. P. A.

Next round: July 2019

### E.P.A. 2019: New in the programme: EPA on demand!

The *European Parks Academy* is a unique opportunity to learn more about emerging trends and new approaches in the management of protected areas

"Already we can look forward to an interesting programme for the summer academy 2019. The three seminars are highly topical", reports Lisa Wolf, programme coordinator. The seminars of the European Parks Academy are dedicated to World Heritage & Sustainable Tourism, Ecological Monitoring & Innovative Technologies and Transboundary Protected Areas & Successful Management. On four seminar days and two excursion days, the topics will focus on the emerging trends in the practical implementation of international standards.

"New in the programme is the so-called 'EPA on demand'. As a company or expert group you can book your individual seminar precisely tailored to your institution", says Dr. Michael Jungmeier, programme director.

We are looking forward to welcome you in Klagenfurt!
